Abstract: **JP200128604**

**PROBLEM TO BE SOLVED:** To provide an integrated internet protocol(IP) transfer network that separately includes a plurality of IP transfer networks having various properties on its inside.  
**SOLUTION:** A plurality of IP transfer networks with different properties such as an IP telephone network, an IP image network, an IP electronic text network, a best effort network, an IP data multicast network and an IP base IV broadcast network are virtually installed in the inside of the integrated IP transfer network, an address management table is set to the inside of network node device 5-X, 5-Y installed at an external input point of the integrated IP transfer network, terminal addresses and port numbers to distinguish application programs in the inside of terminals are registered in advance to this table, the address and the port number written in a received IP packet are compared with the address and the port number having been registered in the table, and the IP packet is selectively transmitted to the IP transfer networks. Only the addresses may be compared without using the port numbers.

  X   Applicant(s) submit herewith Form PTO/SB/08a-Information Disclosure Statement together with copies, of patents, publications or other information of which applicant(s) are aware, which applicant(s) believe(s) may be material to the examination of this application and for which there may be a duty to disclose in accordance with 37 CFR 1.56.

The relevance of the attached references is that this is the closest art of which Applicant is aware. Applicant submits that the above references taken alone or in combination neither anticipate nor render obvious the present invention, Consideration of the foregoing in relation to this application is respectfully requested.

It is requested that the information disclosed herein be made of record in this application.

Respectfully submitted,

/David J. McKenzie/
